

Simple-to-use ELECYLINDER with Built-in Controller High-power Mini Rod & Mini Double-guide Rod Type

Simple-to-use ELECYLINDER with Built-in Controller High-power Mini Table & Mini Wide Table Type

# EC RP/GD5 EC TC/TW5

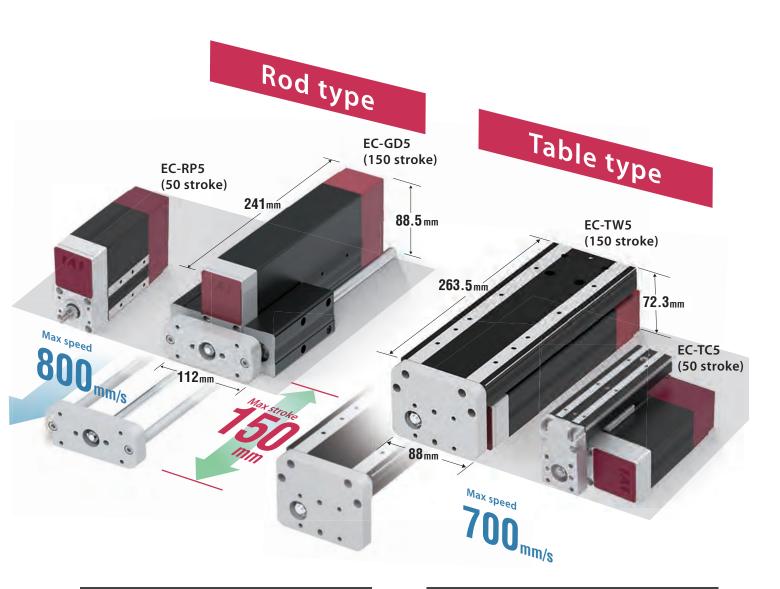

# Compact and powerful! New additions to our mini type lineup!

# **EC** High-power Mini EleCylinder

EC-RP5/GD5/TC5/TW5 with more Stroke, Speed, and Power

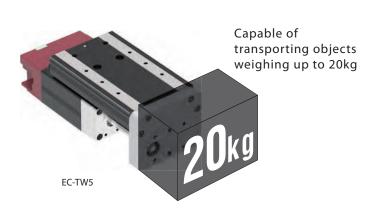

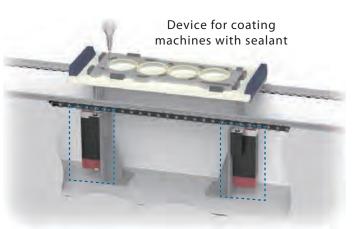

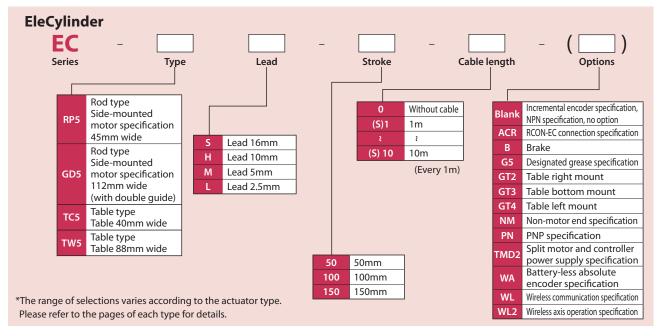

Small but powerful!

Ideal for reducing space required by devices

# Mounting method

Mount according to the mounting method for the applicable type.

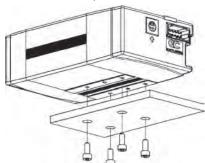

#### Rod type (RP/GD)

RP

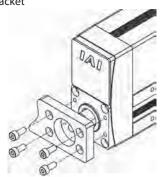

Use the mounting holes on the bottom surface of the body

Use the mounting holes on the side surface of the body

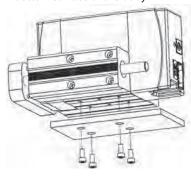

Use the mounting holes on the front bracket

GD

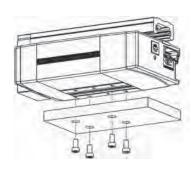

Use the mounting holes on the bottom surface of the body

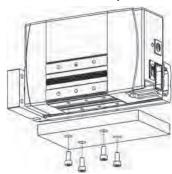

### Table type (TC/TW)

● TC

Use the mounting holes on the bottom surface of the body

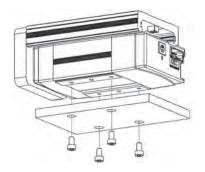

Use the mounting holes on the side surface of the body

● TW

Use the mounting holes on the bottom surface of the body

### Precautions for installation

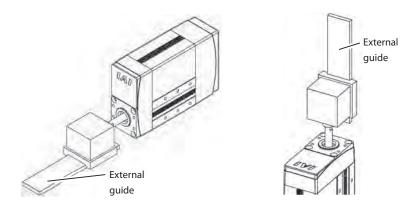

#### External guide fixing method

Even when parallelism of the guide and the actuator has been adjusted, incorrect fixing risks premature damage to the actuator. See below:

#### Rod type (RP5)

"Rigid attachment" is recommended to secure the product to an external guide. Be sure to perform home return after external guide mounting.

Rotation stop rod type actuators cannot bear the rotational force of the rod, so the rotation direction of the rod must be restricted. A "floating joint" does not restrict rotation of the rod. This causes ball screw misalignment, which can result in premature damage to the actuator. (Floating joints with rotation direction restrictions are acceptable.)

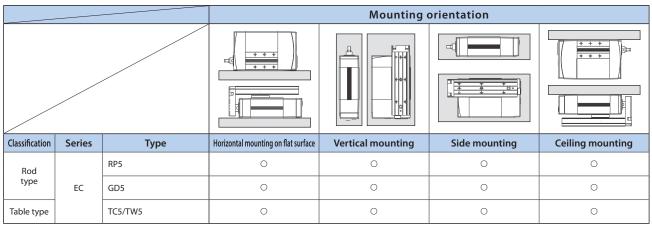

#### Rod type, table type

Keep the body installation surface and part mounting surface flatness at 0.05mm/m or lower. Uneven flatness will increase the sliding resistance of the rod/table and may cause a malfunction.

## Mounting orientation

O: Can be mounted

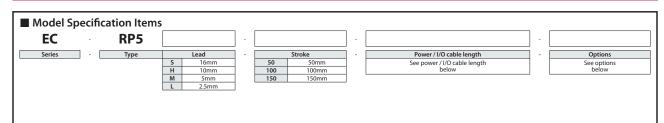

## EC-RP5

Mini

50

**24**<sub>V</sub>

(1) The feed screw has no rotation stop mechanism. Add a rotation stop mechanism such as a guide to the tip of the feed screw when in use. (If there is no rotation stop, the feed screw will rotate instead of traveling back and forth.) Also, do not use floating joints when connecting the rotation stop mechanism to the rod. Please refer to P. 4 for more information on the mounting method and conditions.

- (2) "Main Specifications" displays the payload's maximum value.
  - (3) The value of the horizontal payload assumes that there is an external guide. Do not apply external force to the rod in a direction other than the moving direction.
  - (4) If performing push-motion operations, refer to the "Correlation between Push Force and Current Limit" diagram. The push forces listed are only reference values. Please refer to P. 20 for applicable notes.

Wireless axis operation specification

(5) Pay close attention to the installation orientation. Please refer to P. 4 for details.

#### Power / I/O cable length

#### ■ Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 1) (with connectors on both edges)				
0	No cable	Terminal block supplied (Note 2)					
1~3	1 ~ 3m						
4 ~ 5	4 ~ 5m	CB-EC-PWBIO□□□-RB	CB-REC-PWBIO□□□-RB				
6~7	6 ~ 7m	supplied	supplied				
8 ~ 10	8 ~ 10m						

(Note 1) If RCON-EC connection specification (ACR) is selected as an option.
(Note 2) Only terminal block connector is included. Please refer to P. 23 for details.
(Note) Robot cable is standard.

#### ■ 4-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 1) (with connectors on both edges)
S1 ~ S3	1 ~ 3m		
S4 ~ S5	4 ~ 5m	CB-EC2-PWBIO□□□-RB	CB-REC2-PWBIO□□□-RB
S6 ~ S7	6 ~ 7m	supplied	supplied
S8 ~ S10	8 ~ 10m		

(Note 1) If RCON-EC connection specification (ACR) is selected as an option. (Note) Robot cable is standard.

#### Name Option code RCON-EC connection specification (Note 1) В 19 Designated grease specification (Note 2) G5 19 PNP specification PN 19 Split motor and controller power supply specification TMD2 19 Battery-less absolute encoder specification WA 19 Wireless communication specification WL 20

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.

(Note 2) The operating temperature environment for designated grease specification (G5) is 10°C to 40°C.

Power / I/O cable length See power / I/O cable length below

Options

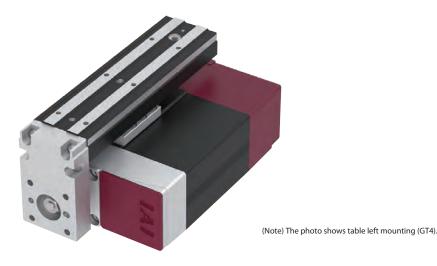

- (1) "Main Specifications" displays the payload's maximum value at 50mm stroke.
- (2) If performing push-motion operations, refer to the "Correlation between Push Force and Current Limit" diagram. The push forces listed are only reference values. Please refer to P. 20 for applicable notes.
- (3) Be sure to select an option code for the table mounting direction from the options list below.
- (4) The reference values of the overhang load length are 100m or less in the table top direction, 150mm or less in the table tip direction for the Ma direction, and 120mm or less in the Mb/Mc directions.
- (5) Pay close attention to the installation orientation. Please refer to P. 4 for details.

#### Power / I/O cable length

#### ■ Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 1) (with connectors on both edges)
0	No cable	Terminal block supplied (Note 2)	
1~3	1 ~ 3m		
4 ~ 5	4 ~ 5m	CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB
6~7	6 ~ 7m		supplied
8 ~ 10	8 ~ 10m		

(Note 1) If RCON-EC connection specification (ACR) is selected as an option.
(Note 2) Only terminal block connector is included. Please refer to P. 23 for details.
(Note) Robot cable is standard.

#### ■ 4-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 1) (with connectors on both edges)
S1 ~ S3	1 ~ 3m		
S4 ~ S5	4 ~ 5m	CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB
S6 ~ S7	6 ~ 7m		supplied
S8 ~ S10	8 ~ 10m		

(Note 1) If RCON-EC connection specification (ACR) is selected as an option. (Note) Robot cable is standard.

### EleCylinder Series Options

**RCON-EC connection specification** \*Cannot be selected with the TMD2 and PN options (the ACR option includes the split motor and controller power supply specification)

Model ACR

**Description** This option should be selected to connect over an R-unit to a field network.

\*If this option is selected, the power supply must be split motor and controller power supply specification and the input/output specification must be NPN. Therefore, it cannot be selected with the TMD2 or PN options.

#### **Brake**

Model

Description When the actuator is mounted vertically, this works as a holding mechanism that prevents the table or rod from falling and damaging any attachments when the power or servo is turned off.

#### **Designated grease specification**

Model G5

Description Replaces the grease applied to the actuator ball screw, linear guide, and sliding surface of the rod with food machine grease (White Alcom Grease).

#### **Table mounting direction**

Model GT2 / GT3 / GT4 Applicable models EC-TC5

Description Select the table position of EC-TC5. Be sure to enter a code in the model number.

#### Non-motor end specification

Model Applicable models EC-TC5/TW5

Description The home position is normally set to the motor side. This option is for setting the home position on the other side in order to accommodate variations in equipment layout, etc.

#### **PNP specification** \* Cannot be selected with ACR option, which uses the NPN specification.

Model PN

EC Series products provide NPN specification input/output for connecting external devices as standard. Specifying this option changes input/output to the PNP specification.

Split motor and controller power supply specification \* Cannot be selected with the ACR option (the RCON-EC connection spec. is a split motor and controller power supply spec.)

Model TMD2

Description

This option includes an actuator operation stop input.

Select this option to allow shutting down the actuator drive power only.

Please refer to P. 23 for more information on wiring.

#### **Battery-less absolute encoder specification**

Model WA

Description EC Series products use the incremental encoder specification as standard. Specify this option to have a built-in battery-less absolute encoder installed.

#### **Wireless communication specification**

Model

 $\mathsf{WL}$ 

Description

This option enables support for wireless communication. Specifying this option enables wireless communication with the TB-03 teaching pendant. The start point, end point, and AVD can be adjusted via wireless communication.

#### Wireless axis operation specification

Model

WL2

Description

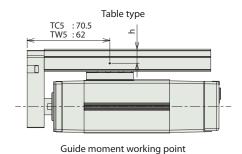

Specifying WL2 allows for the product to operate wirelessly as with WL (start point, end point, and AVD adjustment), and to also perform axis travel operation tests (forward end/backward end movement, jog, and inching). However, this function is not meant to perform automatic operation. Please refer to P. 118 of the EC Catalog V10 for precautions on axis operations using a wireless connection. (Note) Customers cannot change WL to WL2, or WL2 to WL. Please contact IAI for this.

### Notes on use of table type actuators for push-motion operation

When performing a push-motion operation using a table type actuator, be sure to limit the push current so that the reactive moment caused by the push force does not exceed the dynamic allowable moment (Ma, Mb) listed in the catalogue.

Please refer to the figures below, which show the working point of the guide moment, for help with calculating the moment. This can be done by considering the offset of the push force application position.

Note that applying excessive force that exceeds the dynamic allowable moment may damage the guide and reduce its service life. Select a push current that is safely within its limits.

h dimension	
Table type	
TC5	12
TW5	16
*\	nit: mm

### **Push-motion operation**

Push-motion operation is a function that keeps the rod or slider pushed up against a part, as with an air cylinder. Please check the usage instructions and precautions below prior to use.

#### [Push force adjustment]

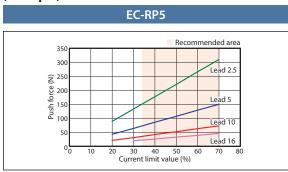

- The push force during a push-motion operation can be adjusted by changing the "Push force (%)" on EleCylinder.
- Please check the push force for the applicable model in the diagram
   "Correlation between push force and current limit" on the production specification page, and select a model that matches your conditions.

#### [Lead selection method]

Select a lead with the desired push force in the recommended current limit value range (the colored area in the graph).

Lead 10 would be appropriate for the EC-RP5 type shown in the figure to the right if a push force of 50N is desired. Selecting lead 5 would limit the adjustment range.

#### (Example)

<Correlation between push force and current limit>

 $\triangle$ 

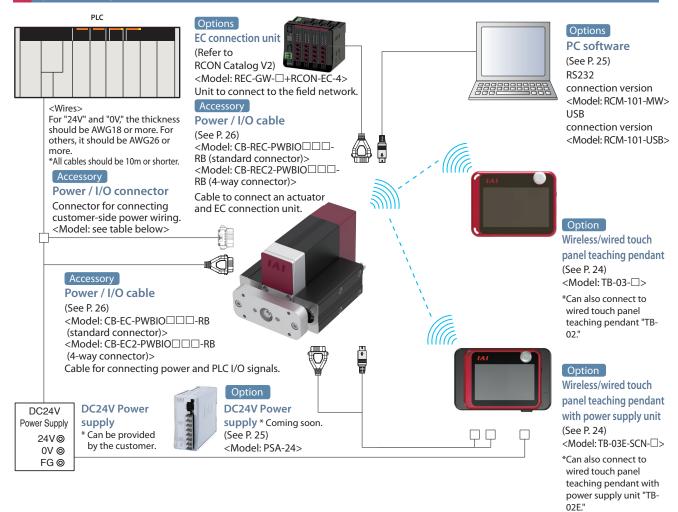

Caution

- The diagram "Correlation between push force and current limit" show lower guidelines for push force for each current limit value.
- Individual differences in the motor and variations in mechanical efficiency may cause the push force lower limit to be exceeded by around 40%, even if the current limit value is the same.

This is especially true when the current limit value is 30% or lower, and the push force lower limit could be exceeded by 40% or more.

#### **System Configuration**

#### List of accessories

#### ■ Power / I/O cables, connectors

[Standard connector]

Product	category	
Power / I/O cable length (selected with actuator model)	RCON-EC connection specification (ACR) selection	Accessory
0	No	Power / I/O connector *
Ü	Yes	_
1 10	No	Power / I/O cable (CB-EC-PWBIO□□□-RB)
1 ~ 10	Yes	Power / I/O cable (CB-REC-PWBIO□□□-RB)

<sup>\*</sup> Model code: 81702010-03-000-00 in case of TMD2 selection; otherwise 1-1871940-6-ENG

#### [Four-way connector]

Product	category	
Power / I/O cable length	RCON-EC connection specification	Accessory
(selected with actuator model)	(ACR) selection	
S1 ~ S10	No	Power / I/O cable (CB-EC2-PWBIO□□□-RB)
31 ~ 310	Yes	Power / I/O cable (CB-REC2-PWBIO□□-RB)

#### **Basic Controller Specifications**

	Specification ite	em	Specification content
Number of	controlled axes		1 axis

Data retenti	ion memory		Position and parameters are saved in non-volatile memory (no limit to number of rewrites)
LED	Controller status	s display	Servo ON (green light ON) / Alarm (red light ON) / Initializing when power comes ON (orange light ON) / Minor failure alarm (green/red alternately blinking) / Operation from teaching: Stop from teaching (red light ON) / Servo OFF (light OFF)
display	Wireless status	display	Initializing wireless hardware, without wireless connection, or connecting from TP board (light OFF)  Connecting through wireless (green blinking) / Wireless hardware error (red blinking) / Initializing when power comes ON (orange light ON)
	naintenance/ e maintenance		When the number of movements or operation distance has exceeded the set value or in case of overload warning, the LED (right side) blinks alternately green and red. *Only when configured in advance
Ambient op	erating temperat	ure	0 ~ 40°C
Ambient op	erating humidity		5%RH ~ 85%RH (Non-condensing or freezing)
Operating e	nvironment		No corrosive gas and excessive dust
Insulation re	esistance		500VDC 10MΩ
Electric sho	ck protection med	chanism	Class 1 basic insulation
Cooling me	-		Natural air cooling
			1

(Note 1) Inrush current flows for approximately 5ms after the power is input. (At 40°C.) Inrush current value differs depending on the impedance on the power line.

#### Solenoid valve method

EleCylinder products normally use a double solenoid method.

Change parameter No. 9 ("Solenoid valve type selection") to use the single solenoid method.

#### <Caution>

Operation cannot be performed using the single solenoid method when operating connected to RCON-EC.

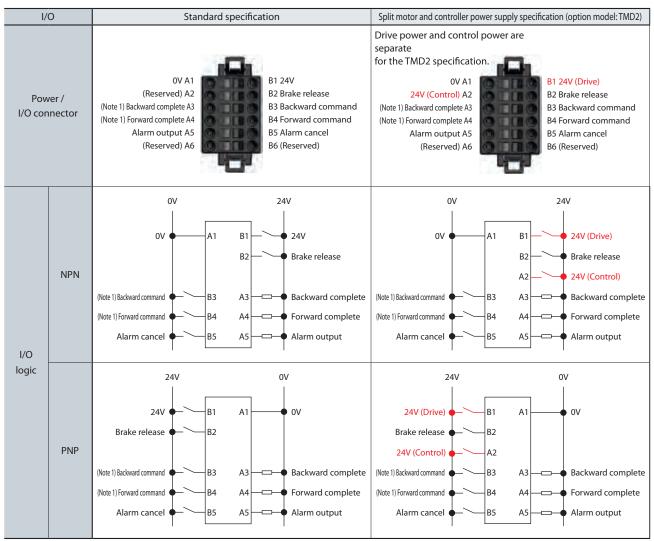

#### I/O (Input/Output) Specifications

I/	O O		Input	0	utput
		Input voltage	24VDC ±10%	Load voltage	24VDC ±10%
		Input current	5mA per circuit	Maximum load current	50mA per point
Specifi	cations	ON/OFF voltage	ON voltage: Min. 18VDC OFF voltage: Max. 6VDC	Residual voltage	2V or less
		Leakage current	Max. 1mA per point	Leakage current	Max. 0.1mA per point
Isolation	method	Non-isolated f	rom external circuit	Non-isolated fr	om external circuit
1/0	NPN	Injust terminal Injustice of the Injusti	1996 G Street Street	Internal circuit	External power 24V Output terminal
logic	PNP	External gover 24V	100KG sternal count	Internal power	180 Capat ternoral

(Note) Isolation method is non-isolated. When grounding an external device (such as a PLC) connected to EleCylinder, use the same ground as EleCylinder.

#### I/O Signal Wiring Diagram

(Note 1) Switching to the single solenoid method will change B3 to "Forward/Backward command" and B4 to "Unused."

#### I/O Signal Table

	Power	/ I/O connector pin assignment	
Pin No.	Connector nameplate name	Signal abbreviation	Function overview
B3 (Note 1)	Backward	ST0	Backward command
B4 (Note 1)	Forward	ST1	Forward command
B5	Alarm cancel	RES	Alarm cancel
A3	Backward complete	LSO/PE0	Backward complete/push complete
A4	Forward complete	LS1/PE1	Forward complete/push complete
A5	Alarm	*ALM	Alarm detection (b-contact)
B2	Brake release	BKRLS	Brake forced release (for brake equipped specification)
B1 (Note 2)	24V	24V	24V input
A1	0V	0V	0V input
A2 (Note 2)	(24V)	(24V)	24V input

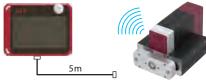

(Note 1) Switching to the single solenoid method will change B3 to "Forward/Backward" and B4 to "Unused." However, the power / I/O connector display will still read "B3: Backward" and "B4: Forward."

(Note 2) B1 is 24V (Drive) and A2 is 24V (Control) for the split motor and controller power supply specification (TMD2).

#### Option

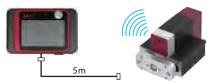

#### Wireless/wired touch panel teaching pendant

- Features This teaching device supports wireless connections.
  - Start point/end point/AVD input and axis operation can be performed wirelessly.
- Model TB-03- Please contact IAI for the current supported versions.
- Configuration Wireless or wired connection

# Wired/wireless touch panel teaching pendant with power supply unit

- Model TB-03E- Please contact IAI for the current supported versions.
- Configuration Wireless or wired connection

#### TB-03 body specifications

Power input	24VDC ±10% [supplied from controller]
voltage range	5.9VDC (5.7 ~ 6.3V) [supplied from AC adapter]
Power consumption	3.6W or less
Consumption current	150mA (supplied from controller)
Ambient operating temperature	0 ~ 40°C (Non-condensing or freezing)
Ambient operating humidity	5%RH ~ 85%RH (Non-condensing or freezing)
Ambient storage temperature	-20 ~ 40°C
Degree of protection	IPX0
Mass	670g (body) + approx. 285g (dedicated cable)
Charging method	Wired connection with dedicated AC adapter/controller

#### Power supply unit specifications

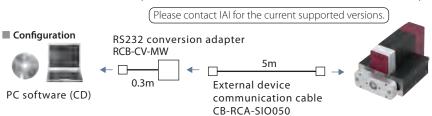

Rated input voltage	Single-phase 230VAC ±10%
Input Under rated I/O conditions in current ambient temperature of 25°C	0.6A typ. (230VAC)
Frequency range	50Hz ±5%
Power Under rated I/O conditions in capacity ambient temperature of 25°C	145VA (230VAC)
Output voltage	24VDC ±10%
Load current	With energy-saving setting disabled: Rated 3.5A, max. 4.2A With energy-saving setting enabled: Rated 2.2A
Output capacity	With energy-saving setting disabled: Rated 84W, max. 98.4W With energy-saving setting enabled: Rated 52.8W
Ambient operating temperature	0 ~ 40°C (Non-condensing or freezing)
Ambient operating humidity	5%RH ~ 85%RH (Non-condensing or freezing)
Ambient storage temperature	-20 ~ 70°C
Atmosphere	No corrosive gas and excessive dust
Altitude	1000m or less above sea level
Vibration resistance	Frequency: 10 ~ 57Hz / Amplitude: 0.075mm Frequency: 57 ~ 150Hz / Acceleration: 9.8m/s² [XYZ directions] Sweep time: 10 minutes, Number of sweeps: 10
Degree of protection	IP30
Mass	Approx. 740g
Cooling method	Natural air cooling

#### PC software (Windows only)

Features This start-up support software provides functions such as position teaching, trial operation, and monitoring. It provides a complete range of functions required to make adjustments, to help reduce start-up time.

■ Model RCM-101-MW (with an external device communication cable + RS232 conversion unit)

■ Model RCM-101-USB (with an external device communication cable + USB conversion adapter + USB cable)

(Please contact IAI for the current supported versions.)

**■** Configuration

USB cable PC software (CD) CB-SEL-USB030

USB conversion adapter **RCB-CV-USB** External device communication cable CB-RCA-SIO050

#### 24V power supply

Simple-to-use Mini Rod & Table Types with Built-in Controller

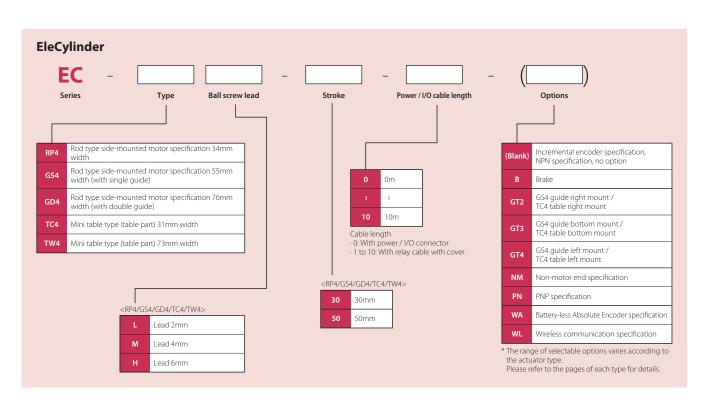

# Mini EleCylinder

### Mini EC Models & Features

## Model Specification Items

Palm size

# Mini EleCylinder

Mini Guided Rod type

78mm

Mini Table type

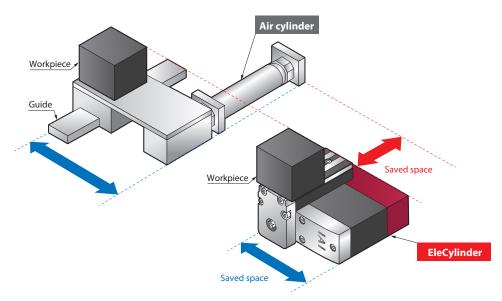

## 1. It can be used in narrow spaces.

- (1) The use of a nut rotation mechanism reduces the size.
- (2) Even with a built-in controller, the size is a compact  $55\text{mm} \times 105\text{mm} \times 78\text{mm}$ .

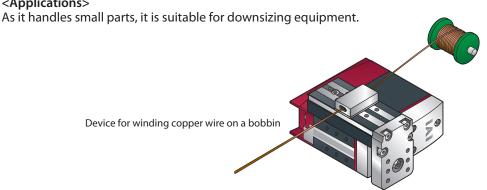

2. As it has a guide, no external guide is required.

- (1) The guide design process can be eliminated.
- (2) It helps save space.

<Applications>

# Product Lineup

# Mounting method

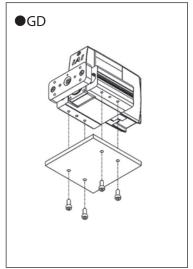

### Mini Rod type (RP)

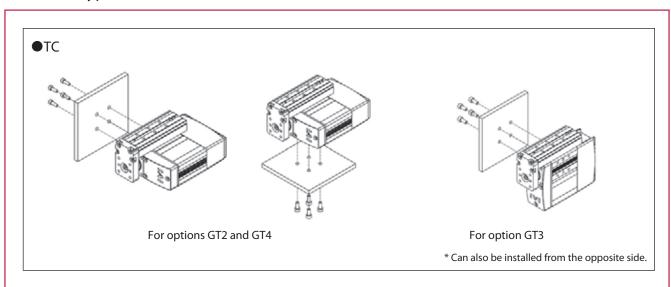

# Mounting method

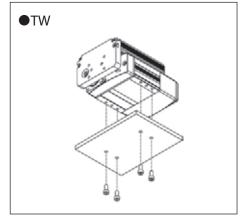

### Mini Rod type (GS/GD)

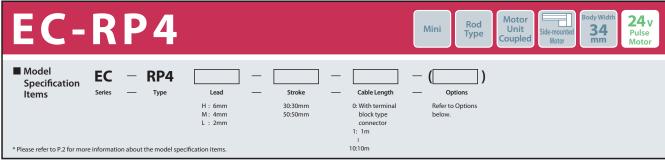

### Mini Table type (TC/TW)

\* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please contact IAI for more information regarding mounting positions.

(1) Since the feed screw has no rotation stopper, add a rotation stop mechanism such as a guide to the tip of the feed screw when in use. (If there is no rotation stopper, the feed screw will rotate instead of traveling back and forth.)
Also, do not use floating joints when connecting the rotation stop mechanism to the rod. Please refer to P.3 for mounting methods.

- (3) The value of the payload assumes that there is an external guide. (4) When performing push-motion operation, refer to P.16.
- (2) The maximum acceleration/deceleration is 0.3G for lead 2 and 0.5G for leads 4 and 6.

#### Table of Payload by Speed/Acceleration

Overview	A data setter that supports wireless connection. The start point, end point and AVD can be input with wireless connection.	A teaching pendant equipped with functions such as start point, end point, and AVD input, trial operation, and monitoring.	Software for start point input, end point input and AVD input, trial operation, and monitoring using a PC. Both the RS232C version and USB version are available for PC connection.

Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please contact IAI for more information regarding mounting positions.

OIN

(1) Horizontal payload is the value when also using a guide so that radial and moment loads are not applied to the rod. If not installing a guide, refer to the correlation diagram of radial load and service life (P.16).

Use the double guide type if force will be applied in the direction of rotation.

- (2) The maximum acceleration/deceleration is 0.3G for lead 2 and 0.5G for leads 4 and 6.
- $\hbox{(3) When performing push-motion operation, refer to P.16.}\\$
- (4) Be sure to select an option code for the guide mounting direction from the options table below.

Model	☐ TB-03 (for wired/wireless connection)	☐ TB-02 (for wired connection only)	☐ RCM-101-MW (RS232 connection version) ☐ RCM-101-USB (USB connection version)
	A data setter that supports wireless connection. The start point, end point and AVD can be input with wireless connection.	A teaching pendant equipped with functions such as start point, end point, and AVD input, trial operation, and monitoring.	Software for start point input, end point input and AVD input, trial operation, and monitoring using a PC. Both the RS232C version and USB version are available for PC connection.

Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please contact IAI for more information regarding mounting positions.

(1) The maximum acceleration/deceleration is 0.3G for lead 2 and 0.5G for leads 4 and 6. (2) When performing push-motion operation, refer to P.16.

Item	Description	
Drive system	Ball screw ø6mm, rolled C10	
Positioning repeatability	±0.05mm	
Table/frame	Material: Aluminum, black alumite treatment	
Allowable static moment Ma direction: 8.3N·m, Mb direction: 8.3N·m, Mc direction: 26.3		
Allowable dynamic moment (*)	Ma direction: 5.4N·m, Mb direction: 5.4N·m, Mc direction: 17.2N·m	
Ambient operating temperature/humidity	0 to 40°C, 85% RH or less (Non-condensing)	
Service life	5000km or 50 million cycles	

- (\*) Assumes a standard rated life of 5000km. The service life will vary depending on operation and installation conditions.
- Reference for overhang load length:

  May 100 years on less in the table to a

 $\mbox{Ma:}\mbox{100mm}$  or less in the table top direction, 50mm or less in the table tip direction Mb, Mc: 120mm or less

Allowable load moment directions

Please refer to the RoboCylinder General Catalog for more information regarding the directions of the allowable moment and overhang load length.

Please refer to the EC manual regarding the displacement of the table. \\

# EleCylinder Series Options

## **Brake**

Model

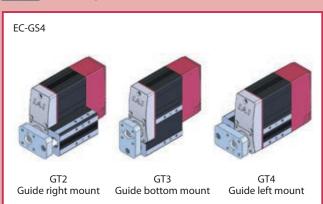

Applicable Models All Models

When the actuator is mounted vertically, this works as a holding mechanism that prevents the rod or table from falling and damaging any attachments when the power or servo is turned off.

## **Guide mounting direction / Table mounting direction**

Model GT2 / GT3 / GT4 Applicable Models EC-GS4/TC4

Description Select the guide shaft position of EC-GS4 and the table position of EC-TC4.

## Non-motor end specification

Model

NM

Applicable Models EC-TC4/TW4

The normal home position is set by the table on the motor side, but there is the option for the home position to be on the other side to accommodate variations in equipment layout, etc.

## **PNP** specification

Model PN

Applicable Models All Models

The EC series offers NPN specification input/output for connecting external devices as standard. Specifying this option changes input/output to PNP specification.

## **Battery-less Absolute Encoder specification**

Model WA Applicable Models All Models

The EC series offers incremental encoder specification as standard. Specifying this option installs a built-in battery-less absolute encoder.

## **Wireless communication specification**

Model WL

Applicable Models All Models

This option supports wireless communication. Specifying this option enables wireless connection with a dedicated Touch Panel Teaching Pendant TB-03 with wireless data setting function for EC.

The start point, end point, and AVD can be adjusted by wireless communication.

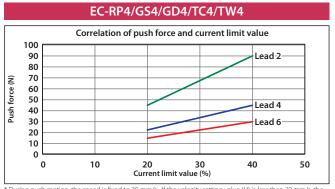

# Correlation of push force and current limit value

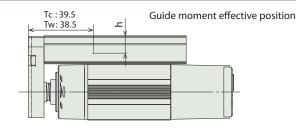

In push-motion operation, the push force can be changed by setting the current limit value of the controller between 20% and 40%.

The maximum push force will vary depending on the model, so please refer to the graph below, and select a type based on the needed push force for your intended use.

## **Correlation of Push Force and Current Limit Value**

h dime	nsion
Mini tak	ole type
TC4	10.5
TW4	10.5

\*Unit: mm

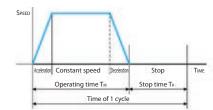

## ■ Notes for Mini Table Types

When performing the push-motion operation with the mini table type please limit the push current in order that the reactive moment caused by the push force does not exceed the dynamic allowable moment (Ma, Mb). Please refer to the figure above, which show the working point of the guide moment, for help with calculating the moment. This can be done by considering the offset of the push force application position. Please note that if excessive force which exceeds the dynamic allowable moment is applied, it may damage the guide and shorten its service life. Please keep this in mind and select a push current that is safely within its limits.

## **Duty cycle**

Duty cycle is the percentage of the actuator's active operation time in each cycle. The duty ratio for each Mini EleCylinder type is 100% at ambient temperatures of 0 to 40°C even during operation at maximum

velocity/acceleration/deceleration.

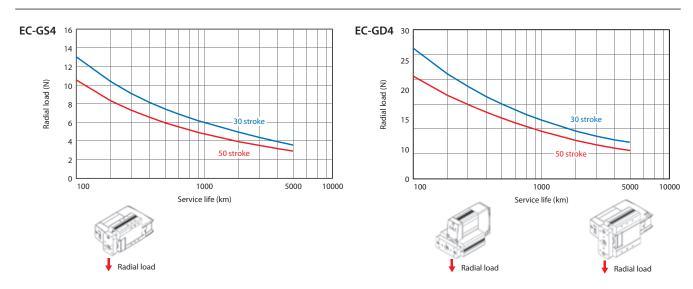

[Duty Cycle]

The duty ratio is the operating rate shown as the actuator's operating time during one cycle in %.

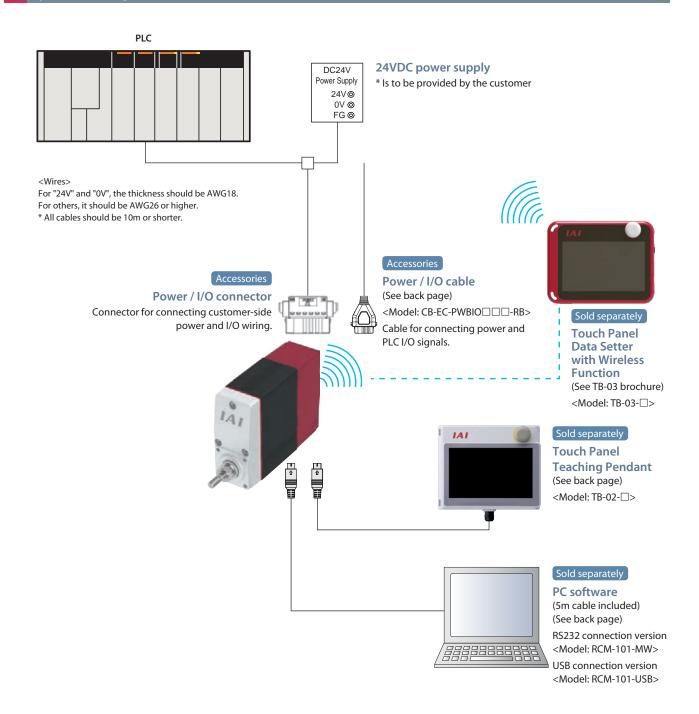

$$D = \frac{T_M}{T_M + T_R} \, \times \, 100 \, (\%) \, \begin{array}{c} \text{D: Duty} \\ \text{Tisc Operating time} \\ \text{(incl. push-motion operation} \\ \text{Tisc Stop time} \end{array}$$

# **Correlation of Allowable Radial Load and Service Life**

## **System Configuration**

## **List of Accessories**

Product category	Accessories
Connector for EC 24VDC power supply / PLC I/O wiring	Power / I/O connector (1-1871940-6)
Connector cable for EC 24VDC power supply / PLC I/O signals	Power / I/O cable (CB-EC-PWBIO□□□-RB)

## Basic Controller Specifications

	Specification it	em	Specification content
Number of	controlled axes		1 axis
Power supp	ly voltage		24VDC ±10%
Power capa	city	Mini type	With energy-saving setting disabled: Max. 4.0A With energy-saving setting enabled: Max. 2.0A
Brake releas	se power supply		24VDC ±10%, 200mA (only for external brake release)
Generated l	neat		8W (at 100% duty)
Inrush curre	ent	Mini type	10A
Momentary	power failure res	istance	Max 500μs
Motor size			□28
Motor rated	l current		1.2A
Motor cont	rol system		Weak field-magnet vector control
Supported	encoders		Incremental (800pulse/rev), battery-less absolute encoder (800pulse/rev)
SIO			RS485 1ch (Modbus protocol compliant)
		Number of input	3 points (forward, backward, alarm clear)
		Input voltage	24VDC ±10%
	Input	Input current	5mA per circuit
	specification	Leakage current	Max 1mA/1 point
810		Isolation method	Non-isolated
PIO		No. of output	3 points (forward complete, backward complete, alarm)
		Output voltage	24VDC ±10%
	Output	Output current	50mA/1 circuit
	specification	Residual voltage	2V or less
		Isolation method	Non-isolated
Data setting	and input meth	ods	PC software, touch panel teaching pendant, data setter
Data retent	ion memory		Position and parameters are saved in non-volatile memory. (No limit to rewrite)
LED	Controller statu	s display	Servo ON (green light ON) / Alarm (red light ON) / Initializing when power comes ON (orange light ON) / Minor failure alarm (green/red alternately blinking) / Operation from teaching: Stop from teaching (red light ON) / Servo OFF (light OFF)
display	Wireless status	display	Initializing wireless hardware, without wireless connection, or connecting from TP board (light OFF)  Connecting through wireless (green blinking) / Wireless hardware error (red blinking) / Initializing when power comes ON (orange light ON)
Predictive n	naintenance/		When the number of movements or operation distance has exceeded the set value and when the LED (right side) blinks alternately green and red at overload warning
Preventativ	e maintenance		* Only when configured in advance
Ambient op	erating temperat	:ure	0 to 40°C
Ambient op	erating humidity		85% RH or less (no condensation or freezing)
Operating a	ımbience		Avoid corrosive gas and excessive dust
Insulation re	esistance		DC500V 10MΩ
Electric sho	ck protection me	chanism	Class 1 basic insulation
Cooling me	thod		Natural air cooling

## I/O Signal Table

	Power / I/O connec	ctor pin assignment	
Pin No.	Connector nameplate name	Signal abbreviation	Function overview
В3	Backward	ST0	Backward command
B4	Forward	ST1	Forward command
B5	Alarm cancel	RES	Alarm cancel
A3	Backward complete	LSO/PE0	Backward complete/push complete
A4	Forward complete	LS1/PE1	Forward complete/push complete
A5	Alarm	* ALM	Alarm detection (b-contact)
B1	24V	24V	24V input
A1	0V	OV	0V input

## Options

## **Touch Panel Teaching Pendant**

■ Features A teaching device equipped with functions such as position teaching, trial operation, and monitoring.

■ Model TB-02- Please contact IAI for the current supported versions.

■ Configuration

Model

#### Specifications

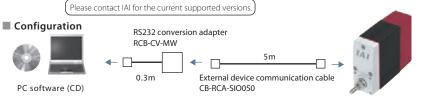

Rated voltage	24V DC
Power consumption	3.6W or less (150mA or less)
Ambient operating temperature	0 to 40°C
Ambient operating humidity	20~ 85% RH (Non-condensing)
Environmental resistance	IP20
Mass	470g (TB-02 unit only)

## PC software (Windows only)

■ Features The start-up support software which comes equipped with functions such as position teaching, trial operation, and monitoring.

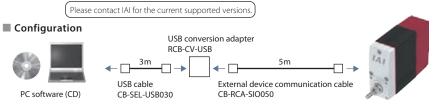

A complete range of functions needed for making adjustments contributes to shortened start-up time.

■ Model RCM-101-MW (with an external device communication cable + RS232 conversion unit)

Supported Windows versions: 7/8/10

RCM-101-USB (with an external device communication cable +USB conversion adapter + USB cable)

## **Maintenance Parts**

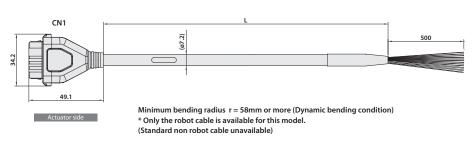

When placing an order for a replacement cable, please use the model name shown below.

### ■ Table of compatible cables

Model name	Power / I/O cable
EC	CB-EC-PWBIO□□-RB

## Model CB-EC-PWBIO . . . -RB

\* Please indicate the cable length (L) in  $\Box\Box\Box$ , E.g.) 030 = 3m

Color	Signal name	Pin No.
Black (AWG18)	0V	A1
Red (AWG18)	24V	B1
Light blue (AWG22)	(reserve)	A2
Orange (AWG26)	IN0	В3
Yellow (AWG26)	IN1	B4
Green (AWG26)	IN2	B5
Pink (AWG26)	(reserve)	В6
Blue (AWG26)	OUT0	A3
Purple (AWG26)	OUT1	A4
Gray (AWG26)	OUT2	A5
White (AWG26)	(reserve)	A6
Brown (AWG26)	BKRLS	B2
